## PROFILE

I am a Software Engineer with over two and half years of experience in IT, specializing in the Airline domain with British Airways. During this time, I've honed my skills in navigating complex systems and crafting innovative solutions. My passion for technology and dedication to enhancing passenger experiences and operational efficiencies drive me in this dynamic industry.

## EXPERIENCE

### SOFTWARE DEVELOPER

#### Coforge Ltd.

**Client** - British Airways

**Project** - Post Booking 2021 - Present

- Software Developer working for a UK-based client: British Airways, with wide domain knowledge in various functional flows like MMB, Change booking, Seating, and Baggage.
- Identified, and replicated on the developer environment and then rectified functional bugs, testing, and backend analysis of various services provided.
- Working under Agile Methodologies of Software Development life cycles using JIRA.
